16 9 Screen Resolution

16:9 (1.78:1) (said as sixteen to nine) is the international standard format of HDTV, non-HD digital television and analog widescreen television PALplus. Japan's Hi-Vision originally started with a 5:3 (=15:9) ratio but converted when the international standards group introduced a wider ratio of 5½ to 3 (=16:9).

16:9 aspect ratio - Wikipedia

The table goes up to 1080p and includes common resolutions like that of a typical 27 inch 16:9 computer monitor and Super Hi-Vision. Note: If you've ever worked with SD content, you'll notice that no resolution here fits the DVD standard. That's because DVDs were originally made to comply with the NTSC broadcasting resolution, which is a non-square pixel standard using the resolution of 720 by 480 pixels, stretched to accommodate either 4:3 or 16:9 content, never producing a true 16:9 ...
