Ecology Building Society - Ethical Savings & Mortgages

Ecology (from Ancient Greek οἶκος (oikos) 'house', and -λογία () 'study of') is the study of the relationships between living organisms, including humans, and their physical environment. Ecology considers organisms at the individual, population, community, ecosystem, and biosphere level. Ecology overlaps with the closely related sciences of biogeography, evolutionary biology ...

Ecology - Wikipedia

Deep ecology is an environmental philosophy that promotes the inherent worth of all living beings regardless of their instrumental utility to human needs, and the restructuring of modern human societies in accordance with such ideas.. Deep ecology argues that the natural world is a complex of relationships in which the existence of organisms is dependent on the existence of others within ...

Catherine brings a wealth of experience from a broad background in development management planning, ecology and conservation, specialising more recently in nature-based solutions in planning. A full member of CIEEM with over 14 years in the ENGO sector, and an Approved Assessor for Building with Nature, she is well-placed to support Assessors ...

About — Building with Nature — Building with Nature

The building is shown in Figures 4 and 5 and is rated as the greenest commercial building in the world. It is a six-story building and has a total area of 52,000 ft² (4800 m²). The building is energy and carbon neutral, but its cost reaches as high as \$18.5 million which yields \$355 per square foot (per 0.09 m²). The center's energy ...

Net-Zero Energy Buildings: Principles and Applications

Charles Darwin called this process natural selection. He and Alfred Wallace were the first to propose that evolution by natural selection could explain the origin of all the multitudes of species on Earth and how they appear so well-adapted in form and function to their particular environments.

What is evolution? | Biological Principles - gatech.edu

Principle 1. Ecological Restoration Engages Stakeholders. Ecological restoration is undertaken for many reasons including to recover ecosystem integrity and to satisfy personal, cultural, social-economic, and ecological values. This combination of ecological and social benefits can lead to improved social-ecological resilience. Humans benefit from a closer and reciprocal engagement with nature.
