The HTTP headers for a  
client's request contain  
information that a

# Acces PDF Cics A How To For Cobol Programmers

server can use to decide how to respond to the request. For example, the following series of headers can be used to specify that the user only wants to read the requested document in French or German, and that the document should only be sent if it has changed since the date and time when the client last obtained it:

Charity reporting and  
accounts. This guide  
summarises the

# Acces PDF Cics A How To For Cobol Programmers

requirement for charities to produce accounts, reports and returns each year. By law, every charity must prepare a set of accounts and a trustees' annual report.
