Game theory is the study of the ways in which interacting choices of economic agents produce outcomes with respect to the preferences (or utilities) of those agents, where the outcomes in question might have been intended by none of the agents. The meaning of this statement will not be clear to the non-expert until each of the italicized words and phrases has been explained and featured in some ...

Game Theory (Stanford Encyclopedia of Philosophy)

Medicine is the science and practice of caring for a patient, managing the diagnosis, prognosis, prevention, treatment, palliation of their injury or disease, and promoting their health. Medicine encompasses a variety of health care practices evolved to maintain and restore health by the prevention and treatment of illness. Contemporary medicine applies biomedical sciences, biomedical research ...

Shibly, 2015). There is, within the components of nursing education, still a challenge of a theory practice gap in nursing education (Maginnis & Craxon, 2010; Davhana- Maselesele et al., 2001). Corlett et al. (2003) described a theory practice gap as the discrepancies found between what students learn in the formal classroom setting and what

H.R. Sonntag, in International Encyclopedia of the Social & Behavioral Sciences, 2001 Dependency theory is a school of thought in contemporary social science which seeks to contribute to an understanding of underdevelopment, an analysis of its causes, and to a lesser extent, paths toward overcoming it. It arose in Latin America in the 1960s, became influential in academic circles and at ...

Dependency Theory - an overview | ScienceDirect Topics

Introduction. The novel coronavirus pneumonia (COVID-19) broke out at the end of 2019 and has spread out quickly throughout the world. This major public health emergency led to a dramatic change all over the world, affecting all aspects of social life, including education (Naciri et al., 2020; Sintema, 2020a,b; Van Lancker and Parolin, 2020). In order to stop the spread of COVID-19 to campus ...

Here, we review the research we have conducted on social contagion. We describe the methods we have employed (and the assumptions they have entailed) to examine several datasets with complementary strengths and weaknesses, including the Framingham Heart Study, the National Longitudinal Study of Adolescent Health, and other observational and experimental datasets that we and others have collected.
