The solution to the above problems is a flexible clamp. Weaving a flexible clamp around a conductor means not pulling and tugging on it to move it from adjacent conductors. Whether dealing with the 10 AWG solid conductor or a 2 AWG (or larger) stranded conductor, installing the flexible clamp is simpler and unquestionably much safer.

Problem #5 - The Electronics Although the electronics are not inherently poor in quality, it is important to emphasize their potential for complication in the Allison 1000 Transmission uniquely. The Allison 1000 is a densely electronic transmission, relying on many solenoids to open and close at the appropriate times for it to operate.
