performed. If there is insufficient length of nerve for primary repair, an interpositional graft from the great auricular nerve, sural nerve, or other suitable donor nerve should be performed.

Facial Nerve Trauma: Evaluation and Considerations in Management

The simplest method—neuroma excision and traction neurectomy has excellent or satisfactory results in 65% of patients . Neuroma excision followed by burying the nerve end in muscle [44], translocating the neuroma away from areas of pressure [45], and centralization techniques [46] have all shown high levels of patient ...
